Feed Mixer Weighing
Feed Management

Optimize inputs
Feed just what they need

Highly accurate load monitoring and logging technology

Clear indicators as display including mobile app option connected via Bluetooth®

Complementary TAP FEED software, tied directly to the weighing workflow

Remote hardware support plus mixer maintenance functionality

As competition increases and margins squeeze, livestock farmers need solutions that reduce inputs and increase production. With feed accounting for over 50% of operating costs and significantly impacting performance, precision management is essential for profitability. Feed mixers efficiently combine ingredients, forming a total mixed ration (TMR). Mixer weighing systems allow users to manage and track feed loads to improve efficiency, reduce waste, and support calculated management strategies. While many farmers continue to manage with hand-written feed sheets, connected software, eliminating paper and streamlining the workflow is the next evolution of operation management. Our solutions improve efficiencies, reduce costs, and optimize production by tracking exactly what was fed.

Reduce Costs

Optimize Production

Improve Efficiency

Topcon Technology:
Indicator, Convertor, Display, App

After determining the feed plan or TMR, loading is the next step in managing inputs, improving efficiency, optimization, and enabling performance tracking. Topcon feed mixer weighing, comprising Digi-Star product line indicators, convertors and load cells, ensures accurate execution and logging. Our solutions also offer a mobile app as an additional display (CabControl or TAP FEED) and a

connection point to feed management software (TAP FEED). The TAP FEED app goes beyond real-time load monitoring, offering basic reports, loads, recipes, and feeding groups. Start with basic digital feed management in the app and connect to TAP FEED software for more robust capability when ready.

Easy-to-Use Feed Management Software

Building upon its predecessor, TMR Tracker, TAP FEED is the latest evolution in modern feed management. Our software is cloud-based and tied to the feed mixer via Bluetooth connection from the indicator to the TAP FEED app. The software provides a modern and intuitive interface with core feed management capability, including planned integration of the most advanced features from TMR Tracker. With subscription options to suit every operation, farmers can easily manage products, feeding groups, feed lists, mixer loads, feeding periods, operators, and more. Efficiently create and export comprehensive reports, including ingredients usage, loads, DM intake per head,

ration delivery, group delivery, and operator accuracy. Permit access and share with trusted advisors, too. Feed management has never been easier, more connected, or cost-effective.

TAP FEED Software
Featuring core digital feed management features with subscription options for more advanced dairies and advisors. Cloud-based available on common PC browsers. Automatically syncs data with the TAP FEED app.

Easily transfer data from an existing TMR Tracker account.

- The Digi-Star FD1 Premium Feeding solution can connect with all indicators referenced on this page plus many other legacy indicators. Chat with a Topcon sales representative for a full compatibility list.

- Legacy Digi-Star indicators, including the EZ3600, EZ4600, TMR 3610, TMR 4610, and TST 7600 are compatible with TMR Tracker Software and TAP FEED Software.

TAP FEED Subscriptions for Any Livestock Operation

TAP FEED App
Start with the App tied directly to the mixer

TAP FEED Lite
Digital feed Management for any operation

TAP FEED Pro
Advanced capability tailored for dairy operations

TAP FEED Feedlot
Advanced Capability for Feedlot Operations

TAP FEED Advisor
Streamline data and management between feed advisors and farmers
